Ahmad Jawad Bandesha

+92 306 7063209 ◇ Lahore, Pakistan
Email ◇ LinkedIn ◇ GitHub

Skills

Cloud & DevOps: AWS, Docker, Docker Compose, Kubernetes, Helm, Terraform, ArgoCD (GitOps), GitHub Actions, CI/CD, Nginx, Trivy
Languages: Python, Java, C++, JavaScript, Bash
Web & APIs: React, HTML, CSS, Tailwind CSS, REST APIs, Postman
Databases: MySQL, MongoDB, NoSQL, Neo4j
Tools & Fundamentals: Linux, Git, GitHub, Computer Networks

Experience

DevOps Intern Dec 2025 – Mar 2026
AI Tech Spine *Lahore, Pakistan*

- Containerized applications with Docker and Docker Compose, and supported CI/CD pipelines using GitHub Actions to automate builds, tests and deployments.
- Worked with AWS cloud services and Linux environments to deploy, configure and troubleshoot application workloads.
- Collaborated with developers on release workflows, version control practices and environment configuration to improve deployment reliability.

Education

COMSATS University Islamabad 2024 – 2027
BS Computer Science

Projects

CloudOps GitOps Engine | ***ArgoCD, Kubernetes, Kustomize, GitHub Actions, Trivy, Docker***

- Built a pull-based GitOps delivery pipeline with ArgoCD and Kustomize overlays for dev, staging and production, with automated sync and drift self-healing.
- Wrote GitHub Actions workflows for tests, multi-arch Docker builds, Trivy CVE and misconfiguration scanning, Kubeconform validation, and a bot that opens staging promotion PRs.
- Hardened a Go microservice with non-root containers, read-only filesystems, HPA, PodDisruptionBudgets and zero-trust NetworkPolicies; added a one-command KinD cluster setup.

CloudiCraft Studio (DevOps) | ***Docker, Terraform, Helm, Kubernetes, Nginx, Monitoring***

- Containerized a full-stack media app and added Terraform, Helm charts, Kubernetes manifests, an Nginx proxy and a monitoring stack for AWS EKS deployment.

EventOps | ***Docker, Nginx, GitHub Actions, PostgreSQL, Redis, AWS***

- Containerized a React and Express platform with multi-stage non-root Dockerfiles, an Nginx reverse proxy, and dev and production Docker Compose stacks (PostgreSQL, Redis, MinIO).
- Set up a GitHub Actions CI pipeline (build, 77 integration tests, Docker build) and documented an AWS design on ECS Fargate, RDS, ElastiCache, S3 and CloudFront.

90 Days of Cloud Engineering | ***AWS, Terraform, Kubernetes, CI/CD***

- Authored an open-source 95-day roadmap with hands-on labs in Linux, Docker, Kubernetes, Terraform, Ansible, CI/CD and monitoring (20 GitHub stars).

Leadership and Achievements

- **GitHub Campus Expert** – Led student developer communities and promoted open-source and DevOps practices on campus.
- **Notion Campus Leader** – Organized workshops and promoted productivity tools to improve collaboration.
- **AWS Student Builder Group Leader** – Led cloud initiatives and guided students in hands-on AWS projects.
- **Cloudinary Community Creator** – Created content and supported the developer community around media and cloud workflows.

- **Postman Student Expert** – Promoted API best practices and conducted sessions on REST APIs and testing.
- **Neo4j Certified Professional** – Certified in graph database design and query optimization.
- **Pakistan's First Official MLH Organizer** – Organized hackathons, driving participation in tech communities.
- **Google Arcade Champion** – Mentored participants in completing cloud challenges and milestones.
- **Guinness World Record Official Attempt** – Participated in a large-scale global record attempt.
